Office Action Summary

Art Unit: 1714

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-21 are rejected under 35 U.S.C. 112, first paragraph, as based on a disclosure which is not enabling. An electrodeposition coating composition which is critical or essential to the practice of the invention, but not included in the claim(s) is not enabled by the disclosure. See *In re Mayhew*, 527 F.2d 1229, 188 USPQ 356 (CCPA 1976).

Note that the claims only recites ester compounds which are not an electrodeposition coating composition absent a resin component.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 5, 10, 12, 14, 16, 19 and 20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Improper Markush language is recited claims 1, 5, 10, 12, 14 and 16 and an insertion of "the group consisting of" after "selected from" is needed.

The recited "the resin solid matter" in claims 19 and 20 lacks an antecedent basis.

Art Unit: 1714

Claims 1-21 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, first and second paragraph, set forth in this Office action.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US 5,422,392, 5,959,013, 6,031,028 and GB 1,076,319 teach coating compositions but do not teach or suggest the use of the instant ester compound. US 5,959,013 teach an aliphatic ether compounds, and US 5,422,392 (example 1) and GB 1,076,319 (table, page 5) teach an adipate polyester oligomer which does not contain an unit from an aliphatic monoalcohol.
